

WIFI Module

USER'S MANUAL

Please read this user's manual carefully before use
Please keep this user's manual properly

User Privacy Instructions

We take your privacy very seriously and we promise to inform you how we use the data. Users' private data, such as mailboxes, address, before uploading to the cloud, we will get your permission, and we will work hard to protect your data security.

Description

- Receive data signal from cloud server and transmit to the main device;
- Receive data signal from main device and transmit to cloud server;
- To achieve remote upgrade the WIFI module baseplate MCU by cloud server;
- To achieve the remote upgrade of the main device by WIFI module baseplate MCU.

Technical Parameters

OPERATING VOLTAGE: DC8V~12V (Recommended value 12V)

OPERATING CURRENT: Max. recurrent peak 1A, average standby current 50mA

TEMP. RANGE: Operating Temp.: -30℃~+70℃; Storage Temp.: -40℃~+85℃

LED INDICATOR LIGHT:

4 lights, Network configuration indicator,router connection indicator, cloud server connection indicator, 485 communication indicator;

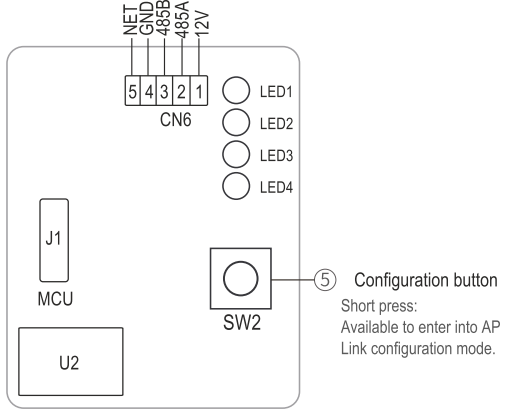

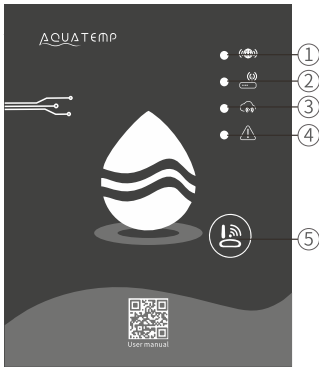

DIMENSION(L×W×H): 78mm×63mm×24mm

Installation

- There is a magnet on the back of the WIFI module, it can be installed indoors or outdoors, and avoid direct sunlight;
- Please scan the following QR code to download APP;

Functional Description

MXL-WX17

ITEM	NAME	LONG LIGHT	SLOW FLASH	EXTINGUISH
①	Network configuration indicator	Configuring Network	SmartLink configuring	Done
②	Router connection indicator	Normal	Abnormal	----
③	Cloud server connection indicator	Normal	Abnormal	----
④	485 communication indicator	Normal	Abnormal	----

Account Login

Use email address and password to register, login or reset the password.

Fig.2 Account Registration interface

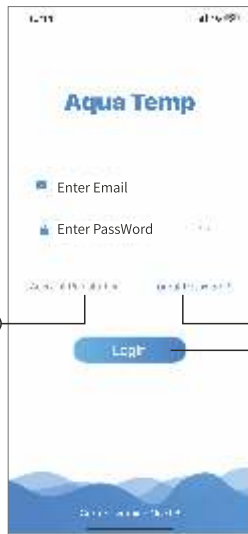

Fig.1 Login interface

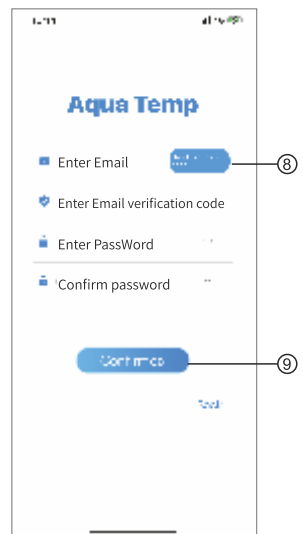

Fig.3 Forgot Password interface

1. Account Registration: To register an account, click ① (Fig.1) to jump to the Account Registration interface, fill in the relevant information and click ② to receive verification code, while completed the application information, click ③ to read the details of the Privacy Policy, then click ④ to agree, and click ⑤, registration is done.

Please note, the valid time of one verification code is 15min, please fill in the verification code within 15min, otherwise you need to ask for a new one.

2. Log in: Follow the instructions on the page(Fig.1), enter your registered email address and password, click ⑥ and jump to device list;

3. Forgot Password: While forget your password, click ⑦ (Fig.1), jump to the Forgot Password interface (Fig.3). Follow the instructions on the page, fill in the relevant informations, click ⑧ to receive verification code from your mailbox, click ⑨ to confirm and password reset is done.

Add Device

After log in, displays My Device interface (Fig. 4) , follow the instruction to add WIFI or DTU.

Fig.8 WIFI Module On interface

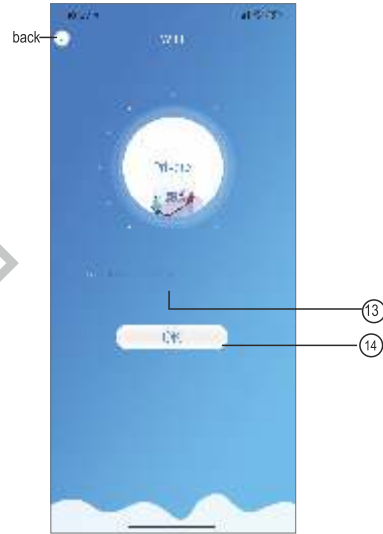

Fig.9 Enter password interface

1. Click ⑩ to confirm the permission of bluetooth,location and camera(Fig.7);
2. Follow the instructions on the page (Fig.8), press button on module and hold for 1s till two lights on, then AP connection is activated, click ⑫ to next;
3. Click ⑬ to enter the WIFI password for the current connection, click ⑭ to confirm.

Fig.10 Allow bluetooth permission

Fig.11 Enable bluetooth permission

Fig.12 Bluetooth setting interface

4. Click "OK" to allow bluetooth permission (Fig.10);
5. Click "Settings" (Fig.11) to enter bluetooth setting interface(Fig.12);
6. Turn on bluetooth and back to the APP, directly enter the searching device interface(Fig. 13), If the connection fails or succeeds, a pop-up window will appear. If the connection fails(Fig.14-1/Fig.14-2), try again as prompted. If successful(Fig.15), check the light 1 of the wifi module indicator, and then select the operation according to the prompts.
7. Click ⑮ to bond device (Fig.16);
8. Click "OK" (Fig.17) to allow the App to use the camera for scanning the WF code on the WIFI module (Fig.19.1), or click "manual input" to enter the WF code(Fig.19.2).
